

## Coiled Tubing Unit Operator

Petrospec Engineering is currently looking for a “Coil Tubing Unit Operator”. The successful candidate must be energetic, meticulous, work well as part of a team, and act as a professional representative on the Company’s behalf. Most of the work will be performed at Operators’ heavy oil fields in northeast Alberta / Saskatchewan, although some international jobs are available periodically. The nature of this work is predominantly outdoors alongside multiple service companies. On-site accommodations provided are most often at the Operators’ dry camps. Working as part of a 2-4 man crew, your role will be to take direction from the Operations Manager you will work with coiled tubing, drilling or service rigs to ensure a successful installations. It will be the crew’s responsibility to ensure that the downhole instrumentation or tools have been successfully installed, tested, packed off at the wellhead and terminated into a control panel, all while ensuring the Company’s level of Quality and Safety standards have been adhered to. Since this position is considered safety sensitive, a clean driver’s license and periodic D&A testing is required.

### *Primary Duties & Responsibilities*

- Consistently demonstrate a commitment to a high level of safety performance.
- Safely operate, service and maintain custom coiled tubing units performing services on customers’ worksites primarily located in Alberta and Saskatchewan.
- Provides leadership and mentorship to field technicians/coil tubing operators in training.
- Inventory and stock coil tubing equipment with related tools and consumables.
- Monitor coil tubing specific equipment certifications.
- Actively contribute to the development of new and existing procedures.
- Take part in pre-job planning with Project Engineers and Operations Management.
- Oversee job preparation, job mobilization and demobilization of crew and equipment.
- Responsible and accountable for pre/ post vehicle & equipment inspections and proper completion of log books.
- Communicate with onsite customer representatives in a professional manner.
- Coordinate on site safety meetings and toolbox talks.
- Provide positive solutions, constructive operational feedback and corrective actions to the customer field representative and/or Operations Manager as required.
- Responsible for onsite ticketing, field reports and other administrative forms as required.
- Open to and capable of comprehending additional technical training related to instrumentation and related technologies and processes.
- Comply with all applicable Health and Safety and Quality regulations as well as internal standards, programs and procedures.
- Other duties as may be assigned from time to time by the Operations Manager.

### *Qualifications*

- Satisfactory driver's abstract and **minimum Class 3** driver's license.
- Preferred 2-5 years of experience as a senior coiled tubing operator.
- There is a manual labour component to this position.
- Mix of local and remote work on a 15/6 or 10/4 rotation, working outdoors in all weather conditions. When working out of town staying at camps or hotels.
- This is a **safety sensitive position** and a pre-job drug/alcohol screening is required. Other drug/alcohol testing includes Post Incident, Reasonable Cause and Random Testing program.
- Up to date H2S, First Aid, PST or eGSO and wellhead boom truck ticket are preferred but not required.
