

PETROSPEC
ENGINEERING

Field Service Technician

Petrospec Engineering is currently looking for an experienced individual, to join a field crew of 2-4 people to go out to remote customers sites for installations as a **Field Technician** or **Field Technician Assistant** depending on experience.

Most of the field work will be performed at Operators' heavy oil fields in northeast Alberta / Saskatchewan. The nature of this work is predominantly outdoors alongside multiple service companies. On-site accommodations are provided most often at the Operators' dry camps. You will be taking direction from the Field Service Supervisor and work with coiled tubing, drilling or service rigs to ensure a successful installation. It will be the crew's responsibility to ensure that the downhole instrumentation or tools have been successfully installed, tested, packed off at the wellhead and terminated into a control panel, all while ensuring the Company's level of Quality and Safety standards have been adhered to. Since this position is considered safety sensitive, a clean driver's license and periodic D&A testing is required. This is a great role for those who like working outside and enjoy learning in a fast-paced setting.

We are willing to work with candidates to obtain or update tickets and train in our specific applications. The Petrospec team is results driven and promotes high quality efforts and products that make our projects successful. Competitive pay and benefits provided.

Please visit our website www.petrospec.com for additional company information.

Primary Duties & Responsibilities

- Participate in the health and safety program.
- Know your health and safety obligations (OHS Act).
- Lead by example regarding health and safety.
- Demonstrate, at all times, a commitment to a high level of safety performance.
- Actively contribute to the development of new and existing procedures
- Take part in pre job planning.
- Participate in job preparation, job mobilization and demobilization
- Responsible and accountable for pre and post vehicle and equipment inspections and proper completion of log books.
- Participate in on site safety meetings/ toolbox talks.
- Follow job programs and job procedures.

- Apply troubleshooting techniques to malfunctioning equipment and unexpected field operations which may require consultation with the customer field representative and/or Operations Manager as required
- Provide positive solutions, constructive operational feedback and corrective actions to the customer field representative and/or Operations Manager as required.
- Competently operate various pieces of equipment required on site and in the shop.
- Competently drive vehicles and various pieces of equipment.
- Perform diagnostic testing and commissioning of instrumentation.
- Coordinate with the Operations Manager regarding general needs for field operations.
- Inspect, Service and maintain all field service equipment.
- Perform shop duties such as general clean up, pick up/deliveries, etc.
- Responsible for completion and submission of all Health and Safety and Quality System documentation as required.

Qualifications

- Safety conscious
- **Minimum Class 5** driver's license, with satisfactory driver's abstract.
- **Experience driving a pick-up truck while pulling a trailer is essential.**
- This is a **safety sensitive position** where a pre-job drug/alcohol & pre-access screening is required. Other drug/alcohol testing includes Post Incident, Reasonable Cause and Random Testing program.
- Mechanically inclined
- 1+ year(s) experience with installing cable protector clamps (e.g. Cannon clamps, ESP clamps, Slingco clamps, etc) is strongly preferred.
- Good physical condition.
- Mix of local and remote work, working outdoors in all weather conditions. When working out of town staying at camps or hotels.
- Up to date First Aid, H2S and CSO is an asset.

Compensation: \$80,000 - \$95,000 / per year
